PROFILE

Computer Science graduate with hands-on experience in Machine Learning, Data Engineering, and Software Development. Skilled in Python, SQL, Flask, AWS, and GCP, with experience building data pipelines, ML models, and end-to-end applications. Strong foundation in data structures, automation, and cloud-based deployment. Seeking entry-level roles in Data Engineering, Machine Learning Engineering, Python Development, or Cloud Engineering.

KEY SKILLS

Programming: Python, SQL, C++, JavaScript, PHP, HTML/CSS

Data and Machine Learning: Pandas, NumPy, scikit-learn, Matplot, Streamlit, Jupyter Notebook

Backend & APIs: Flask, REST APIs, MySQL, Firebase

Cloud Computing & Tools: AWS (EC2, S3, SageMaker), GCP (BigQuery, Vertex AI), Git, Linux

Core Competencies: Data Engineering (ETL), Machine Learning, Data Structures & Algorithms, UiPath Automation

EXPERIENCE

Machine Learning Intern: Unified Mentor (Apr-Oct 2025)

- Developed end-to-end Machine Learning applications including thyroid disease prediction and ASL detection using python and scikit-learn.
- Built data pipelines, trained ML models, and deployed interactive web interfaces using Streamlit.

Data Engineering Intern: AWS Academy (Jan-Apr 2024)

- Designed and implemented ETL pipelines for data ingestion, transformation, and storage.
- Worked with AWS services including S3 and EC2, supporting data warehousing and workflow.

AI/ML Graduate Trainee: AWS Academy (Sep-Nov 2023)

- Practiced TensorFlow and PyTorch model development on AWS SageMaker and cloud servers.
- Performed hyperparameter tuning and cloud-based training using GPU-enabled instances.

Google CloudReady Facilitator: Google Inc. (Apr-Jul 2022)

- Delivered hands-on projects using GCP services including BigQuery, Vertex AI, and Kubernetes.
- Assisted peers with cloud labs and foundational GCP concepts.

EDUCATION

B.Tech, Computer Science & Engineering: Galgotias University **CGPA: 8.83 | Year: 2024**

PROJECTS

- **Password Generator Tool:** Developed a customizable password generator in Python with user-defined security rules.
 - **Healthcare ML Suite:** Built a multi-disease prediction dashboard using ML models for healthcare analysis.
 - **Weather Forecast Application:** Developed a Tkinter-based GUI app integrating OpenWeatherMap API for real-time forecasts.
 - **Machine Learning Prediction Projects:** Implemented multiple classification and regression models using scikit-learn.
 - **NFT Art Generator:** Built a database-driven NFT asset generation system using Python automation.
-

CERTIFICATIONS

- **AWS Academy:** Cloud Foundations, Machine Learning, Data Engineering
 - Google Cloud Skill Boost
 - **NPTEL Exams:** Machine Learning, Data Mining
 - UIPath RPA Foundation and Advanced
 - Python Institute CPDA-25
 - **Oracle** (Database, Java Foundations)
-

RESEARCH AND PUBLICATIONS

Analyzing the Predictions in Healthcare Applications (Aug 2023 - May 2024)

- Evaluated Machine Learning model for healthcare disease prediction using ML
- Published at ICAC2N 2024: 1st Conference (December 2024)

Atal Yaan: India's First Reusable Launch Vehicle (Nov 2021 - May 2023)

- R&D member for indigenous reusable space launch vehicle Atal Yaan.
- Parent Company: **Orbitx Aerospace India**

Extension in Lifespan of Wireless Sensor Networks (Jan 2022 - April 2022)

- Proposed Energy-efficient Algorithm for Wireless Sensor Networks
- Published at OJEl: Issue No. 3 (May-June 2022)

Performance and Evaluation of Non-Fungible Tokens (July 2022 - May 2023)

- Analytical Review of NFT landscape and blockchain
 - Published at ICIDA 2023: 2nd Conference (November 2023)
-
